Kickoffs

Draw a Run Number (RN) from a new Fast Action Card (FAC). Refer to the card for the kicking team to determine the starting point for the return. GL is the goal-line and TB is a touchback, start from the 20 yd line, no return possible.

Kickoffs

For a Run Number of 12, draw a new Fast Action Card. A Run Number of 1 or 12 indicates a return from the Goal Line. For a RN of 2-11, subtract 1 and add that number of yards to the return determined by drawing a new FAC as before.

Kickoffs

If a return is made, use the Return Modifier on the card of the kicking team to modify the Run Number (RN) generated by the return team. E.g Minus 1 means reduce the RN of the return team by 1, Plus 2 means increase the RN by 2.

Advanced Kickoff Rules

Simply draw a Fast Action Card (FAC) and refer to the kicking team's chart to determine the point of return. TB = touchback, ball placed on 20 yard line, no return possible. GL = goal-line, return starts from 0 yard line.

If a Run Number (RN) of 12 is drawn, draw a new FAC. A result of 1 or 12 on this second FAC indicates a kickoff to the goal-line, return starts from the 0 yard line. For a result of 2-11, subtract 1 from this RN, giving a number between 1 and 10, and add this to the result of a new RN on the kicking teams chart. E.g for the Washington Redskins, if a RN of 12 comes up, and then a RN of 8 on a second FAC, that means add (8-1=7) 7 yards to the result of a third FAC. If that RN is 8, indicating a return from the 12 yard line, add the 7 to make it a return from the 19 yard line. This effect is cumulative, so each time a RN of 12 comes up, draw a new RN and add the extra yardage to the point of return (or kick to the goal-line if a RN of 1 or 12 follows it, as explained above)

For the Return Modifier at the bottom of each card, simply use that to modify the Run Number (RN) of **ALL** kickoff returns, this is based on the teams kickoff coverage during the season. Any "Plus" value obviously increases the RN on the return players card, resulting in less yards on the return, any "Minus" value will decrease the return players RN, and lead to an increase in return yardage. To determine the player who makes the return, consult the kickoff return card for the team involved. Draw an FAC and consult the Pass Number (PN), referring to the ranges on the return card itself to decide the returning player. If a modifier makes a Return Number of 1, do not consult the special results on the card – these only apply if a "Pure" Run Number 1 occurs on the return
